10000	9000	6400	2450	2900	3850	500

Overall dimensions may vary according to clients process requirements. Drive size to be confirmed on application. The discharge outlet is positioned midway along the trough, its type selected to meet process requirements. Owing to our continual development, JR Boone reserve the right to amend the figures and dimensions given without prior notice.

Horizontal Mixers

Efficient - using an optimised mixing action to fully and uniformly mix, in the shortest time possible.

Easy to clean - made possible with our clean arm attachment and minimum number mixing paddles.

Versatile - J.R.Boone offer a range of mixers that handle dry or damp powders, pastes, slurries and liquids.

Extras - with a full list of optional equipment that allow the mixers to extend their processing capabilities.

In-house - fully designed and manufactured in-house at our facilities in Cheshire.

Safety: CE Compliance - all machines comply with EC Machinery Directive 2006/42/EC. Machines and mixing systems can also be supplied in accordance with ATEX, PED, and other EC Directives.

Testing - in-house test facilities.

Hire - machines available, information on request.

Home Catering mixes.

Barbecue spices.

Dry Mortar mixes.

Perfumed talcum powder.

Dispersing dyes and pigments into powders.
